Department Profile

Brief Description:

The Department of Information Technology was started in the year 2001. The intake capacity of the department is 60 students. From year 2019-20 department has offering B. Tech. in **Computer Science & Information Technology**. The department has got two years of Accreditation by NBA (National Board of Accreditation) in the academic year 2013-14.

The Department has well experienced faculties from academia as well as a team of young teachers who contribute immensely to the establishment of necessary infrastructure and procedures for conducting an undergraduate program. The faculty profile comprises of personnel with doctorates, postgraduates in respective fields and undergraduate qualifications to meet the curriculum requirements. Faculty members are encouraged to enhance their qualifications, by participating in higher studies and research activities.

Vision:

To become a prominent department of Information Technology producing competent IT professionals with research and innovation skills, inculcating moral values and societal concerns.

Mission:

- To offer high quality education through state of art curriculum and innovative teaching & learning practices.
- To establish state of art laboratories and center of excellence in the field of technology.
- To adopt professional practice, standards, and values.
- To inculcate problem solving aptitude in graduates with lifelong learning skills to become valuable resource for IT industry and society.
- To create, share, and apply knowledge in Computer Science and Information Technology, including in interdisciplinary areas that extend the scope of Computer Science and Information Technology to benefit society.

Program Educational Objectives (PEOs)

- Graduates will a pursue successful career as an IT professionals, researcher, and entrepreneur with high degree of professionalism and values.
- Graduates will demonstrate independent thinking, professionalism, and function effectively in team oriented and open-ended activities in industry, business, and society.
- Graduates will demonstrate adaptation to rapidly changing computer technology through continuous learning leading to self-improvement.

Program Outcomes (POs)

- **PO1: Engineering knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and IT engineering specialization to the solution of complex engineering problems.
- **PO2: Problem analysis:** Identify, formulate, research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics and engineering sciences.
- **PO3: Design/Development of solutions:** Design and develop IT solutions using domain knowledge for engineering problems that meet the specified needs with

appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

- **PO4: Conduct investigations of problems:** Use fundamental knowledge and engineering skills including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
- **PO5: Modern tool usage:** Create, select, and apply appropriate techniques, resources, modern engineering, and IT tools including prediction and modeling to complex engineering activities with an engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
- **PO6: The engineer and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues, and the consequent responsibilities relevant to the professional engineering practice.
- **PO7: Environment and sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of and need for sustainable development.
- **PO8: Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
- **PO9: Individual and team work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
- **PO10: Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
- **PO11: Project management and finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
- **PO12: Life-long learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

 **Program Specific Outcomes (PSOs)**

- **PSO1: Domain Specific Knowledge:** Apply the relevant methods and techniques to develop solutions in the domains of automation and intelligent systems.
- **PSO2: Software Product Development:** Apply the design and deployment principles to deliver a quality software product for the success of business of varying complexity.

The Curriculum of Information Technology:

❖ Silent features of the curriculum:

- Curriculum of IT is in adherence with the AICTE model curriculum.
- Curriculum is industry oriented and covers the GATE syllabus.
- The outcome-based education is a prime aspect of curriculum design.
- Curriculum maintains the balance in the composition of basic science, humanities and professional courses and their distribution in the core and elective offerings.
- Curriculum is categorized into Core Courses, Programming, Inter Disciplinary, Projects / Lab Practices, etc.
- Curriculum consist of electives from various domains like Networking, Database, Programming, and Machine Learning.
- It gives opportunities for Internship, Research, Entrepreneurship, Global certification programs and MOOCs.

❖ IT Curriculum Comparison with AICTE Curriculum:

Sr. No.	Category	AICTE Breakup of Credits	IT Breakup of Credits
1	Humanities and Social Sciences including Management Courses	12*	8
2	Basic Science courses	24*	23
3	Engineering Science courses including workshop, drawing, basics of electrical/mechanical/computer etc.	29*	21
4	Professional core courses	49*	66
5	Professional Elective courses relevant to chosen specialization/branch	18*	15
6	Open subjects – Electives from other technical and /or emerging subjects	12*	8
7	Project work, seminar and internship in industry	15*	20
8	Mandatory Courses [Environmental Sciences, Induction Program, Indian Constitution, Essence of Indian Traditional Knowledge]	(non-credit)	2
	Total	159*	163
*Minor variation is allowed as per need of the respective disciplines

✚ **Teaching Learning Process:**

❖ **Student Centric Teaching-Learning process:**

The use of active learning methods improves classroom delivery and ensures students' participation in classroom activities. To improve the classroom delivery, faculties are using different active and collaborative teaching-learning tools and techniques.

Department Students Associations (CSITE)

Computer Science and Information Technology Engineers (CSITE) is a student association run by students of IT, for students of IT. The main objective of the **CSITE** is to provide platform to students to explore their skills and knowledge through curricular and extra-curricular activities in the field of IT.

✓ **Activities conducted under CSITE:**

- **IEEE Student Branch:**

IEEE student branch of Information Technology department has organized many events including industry expert sessions, Paper presentation events, Programming Challenge, Accelerator program for Android development for students of IT department as well as for outside students. The main objective is to improve the student’s skill in the field of programming, recent technology in industry and to change the student’s perspective about the research.

• **AI-ML Club:**

The Department for Information Technology started the AI-ML Student club. The main goal of this club is to make the students excel in this area and establish the center of excellence in AL-ML. This club helps the students to learn the Python, Machine Learning, Deep Learning concepts, take/arrange training session for other students, undertake the mini /Mega project in said area, take part in various competitions in AI-ML area and present research papers in conference or journal in said area.

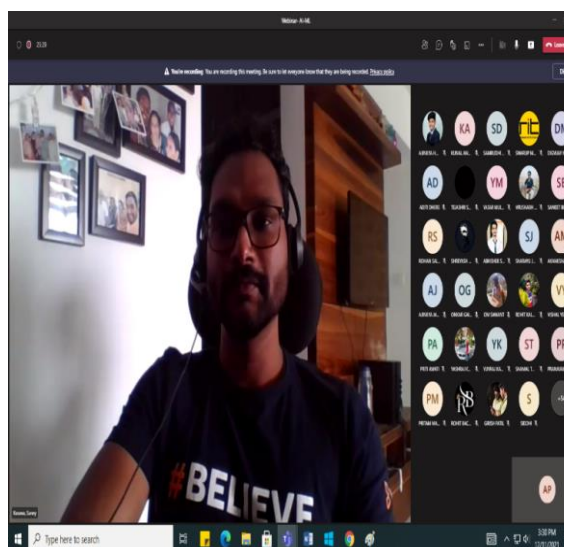

✓ **Activities under AI-ML club:**

• **Android Club:**

Android club was started in Rajarambapu Institute of Technology, Rajaramnagar under the Aakash Center of RIT in collaboration with IIT Bombay in 2016 by students of the Information Technology Department.

✓ **Objectives:**

- To create awareness about android technology among students.
- To solve social problems using Android Technology.
- To learn and gain detailed knowledge about android and other new technologies required for mobile application development.
- To develop and publish android mobile applications.

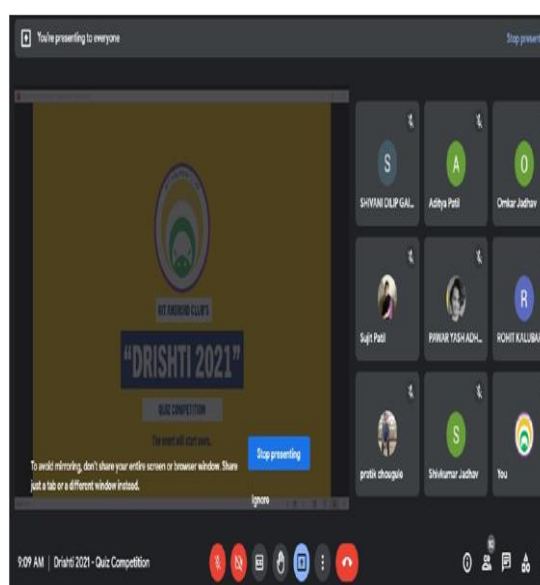

✓ **Activities under Android club:**

Sr. No.	Event Details		Date
1	Trainings and workshops	Training programs and workshops and guest lectures conducted for the students	Throughout the year

✓ **Achievements:**

- A total of 35 Android apps are developed and deployed on the Google Play store.
- Reached more than 60,000 downloads for all apps.
- Faculty Advisor Mr. R. J. Mandale received invitation from Google, MountainView, US for Google IO 2018 to become part of Google developer ecosystem and doing Android publicity.
- Total 10 Android applications developed by Prof. R. J. Mandale that are TeleSensor App, Compiler Master, RIT VivekVahini App, College Selector App, Civil Engg. Quiz Apps, Health_Mantra: pink of health, RIT Music Cell, Play to Learn, Kids Katta, Shree Driving School.
- Total 16 students (Developers of Android app) won Rs.500/- Google play balance as a Gift from Google (Rs. 8000/- Total).
