## Alumni Interactions

### Department of E & TC

Alumni batch of 2011 has voluntarily visited the department on 24<sup>th</sup> August 2017. During their visit department faculty and final year students had interaction with them about placement

opportunities and recent trends in industry in India and abroad. They have also shared important links for placement and research projects in industry.

Ms. Archana Rajeshinde, the Manager, Elite Industries, Sangli visited the campus on 4<sup>th</sup> August 2017. She is alumni of M.Tech Electronics- Batch 2014.

During her meeting with department, she guided about project sponsorship and field training to students.

## Alumni Interactions

### Department of Electrical Engineering

Torrent Power is one of the leading brands in the Indian power sector. It is an integrated power utility and one of the largest private sector players in India having interests in power generation, transmission, distribution and manufacturing and supply of power cables. So to orient students about the Torrent Power structure and environment, guest lecture of Mr. Deepak Kumbhar was arranged for Final Year B. Tech. students on 19<sup>th</sup> September, 2017.

Mr. Deepak Kumbhar is alumni of Electrical Department of batch 2015-2016. He is currently working as Trainee Engineer in Torrent Power, Mumbai.

The Graduate Aptitude Test in Engineering (GATE) is an examination that primarily tests the comprehensive understanding of various undergraduate subjects in engineering and science. The GATE exam is important from higher education and PSU sector employment. So looking at this need a guest lecture by Mr. Anil Lokare was arranged for Second Year students on 19<sup>th</sup> September, 2017.

Mr. Anil Lokare is pursuing PG degree in Shri Guru Gobind Singhji Institute of Engineering and Technology, Nanded.

Bajaj Electricals Limited (BEL) is a part of 75 Year old trusted company "Bajaj Group". Bajaj Electricals Limited has six strategic business units – EPC, Appliances, Fans, Luminaires, Lighting and Morphy. Bajaj Electrical is also in the business of manufacturing, erection and commissioning of Transmission Line Towers, Telecom Towers, Mobile Telecom Towers and Wind Energy Towers. Since Government of India has announced Saubhagya Yojana, an initiative aimed at providing power to all homes, definitely the employment in transmission line construction and commissioning will increase in near future. Considering these current developments in power sector, a guest lecture by Mr. Prasad Barwkar was arranged for Third Year and Final Year students. Mr. Prasad Barwkar is alumni of Electrical Department (Batch 2015-16).

## MoU

### Department of IT

IT department has signed MoU with Amrta Technologies Pvt. Ltd., Pune on 18<sup>th</sup> August, 2017. The main objective of the collaboration is to create the company environment in the institute so that, students will understand how do company works, how projects are executed, and what are the roles and responsibilities in the company.

This step will definitely help students to shape their career in right way.

### Department of CSE

#### One Day workshop on ,"Basics of Android OS"

Android is an open source and Linux-based operating system for mobile devices such as smartphones and tablet computers. Android was developed by the Open Handset Alliance, led by Google, and other companies. Android offers a unified approach to application development for mobile devices which means developers need to develop only for Android, and their applications should be able to run on different devices powered by Android. The first beta version of the Android Software Development Kit (SDK) was released by Google in 2007, whereas the first commercial version, Android 1.0, was released in September 2008. On June 27, 2012, at the Google I/O conference, Google announced the next Android version, 4.1 Jelly Bean.

## Alumni Interactions

Jelly Bean is an incremental update, with the primary aim of improving the user interface, both in terms of functionality and performance.

The source code for Android is available under free and open source software licenses. Google publishes most of the code under the Apache License version 2.0 and the rest, Linux kernel changes, under the GNU General Public License version 2. Android applications are usually developed in the Java language using the Android Software Development Kit. Once developed, Android applications can be packaged easily and sold out either through a store such as Google Play or the Amazon Appstore. Android powers hundreds of millions of mobile devices in more than 190 countries around the world. It's the largest installed base of any mobile platform and is growing fast. Every day more than 1 million new Android devices are activated worldwide.

## Alumni Interactions

### Mechanical Engineering Department

Expert Lecture on "Software Industry" by our reowned alumni Miss. Apurva Satam (Batch 15-16)

Miss. Apurva Satam has interaction with Final Year B. Tech Mechanical Engineering Students on Wednesday, 16<sup>th</sup> August 2017. She is working in TATA Consultancy Services, Pune on ASET Engineer post. She discussed with students about working environment in software industries and core industries of Mechanical Engineering. She is also, a ranker of the batch 2015-16. She has given guidelines and motivation to the students to become successful in their Engineering carrier.

### Department of CSE and IT

#### Open Discussion on "Changing Trends in IT Industries" on Monday, 25<sup>th</sup> September 2017

Mr. Vivek Sawant, Managing Director and CEO of MKCL, Pune; Mr. Sameer Pande, Senior General Manager, MKCL, Pune; Mr. Ajit Jagtap, Chief Technological Officer (CTO) MKCL, Pune.

## Open Discussion Forum

Mr. Vivek Sawant and team started discussion on current trends in IT industries. What is trending today in the industry and what kind of projects should the students take up so that they will find it easy to get a job. Also, more discussion on "MahaLabharti" web application developed by MKCL, Pune. Mr. Ajit Jagtap sir have discussion on Freelancing Projects and Progressive web apps (PWA) could be the next big thing for the mobile web. Originally proposed by Google in 2015, they have already attracted a lot of attention because of the relative ease of development and the almost instant wins for the application's user experience.

A progressive web application takes advantage of the latest technologies to combine the best of web and mobile apps. Progressive web apps take advantage of the much larger web ecosystem, plugins and community and the relative ease of deploying and maintaining a website when compared to a native application in the respective app stores. For those of you who develop on both mobile and web, you'll appreciate that a website can be built in less time, that an API does not need to be maintained with backwards-compatibility (all users will run the same version of your website's code, unlike the version fragmentation of native apps) and that the app will generally be easier to deploy and maintain.
