Semester wise Publication of RIT_Diploma Issue II : June 2022 - January 2023

Institute Vision

To be a recognized polytechnic institute committed to excellence in academics, knowledge creation and delivery to develop socially responsible professionals.

Institute Mission

- To impart technical knowledge and skills along with ethical and social values.
- To strengthen association with industry and alumni to make students technically and socially responsible citizens.
- To promote students for higher studies in reputed institutes.
- To ensure employability, encourage entrepreneurship and promote lifelong learning.

Editorial Board

Chief Patrons:

Dr. Mrs. S. S. Kulkarni, Director, RIT Dr. H. S. Jadhav, Dean Diploma, RIT

Chief Editor:

Mr. A. M. Kulkarni, Coordinator, Student Development

Editorial Committee:

Mr. P. A. Desai, Lecturer, AE

Mr. A. M. Kadam, Lecturer, CE

Ms. A. U. Jadhav. Lecturer. CO

Mr. A. S. Mulani, Lecturer, EE

Mr. S. D. Gaikwad, Lecturer, ME

Mr. C. A. Kulkarni, Lecturer, HA

Mr. S. S. Suryawansi, Lecturer, S & H

Ms. Riya Chavan, Student Representative, (S. Y. Computer)

Mr. Mustakim Sande, Student Representative, (T. Y. Electrical)

NBA Accreditation

RIT Diploma is now **Accredited** by,

Automobile Engineering

Civil Engineering

Electrical Engineering

Mechanical Engineering

Achievement

Team Elite from Department of Mechanical Engineering (Diploma) secured "Gold Award" in Chapter Convention on Quality Concepts organized by QCFI, Pune and "Excellent Award" in National Convention on Quality Concepts (NCQC) organized by MGM, University Chhatrapati Sambhajinagar.

Activities Organized

Department of Civil Engineering Diploma organized one day workshop on Moodle to Introduce handling of moodle for all the faculties on 20th December, 2022.

Department of Mechanical Engineering conducted 12 days Professional Skill Development program in association with AICTE IDEA Lab from 01st to 15th November, 2022 for ITI Students.

Department of Electrical Engineering organized Tree Plantation on the occasion of Farewell function of Third Year Electrical Students on 16th July, 2022.

Department of Automobile Engineering Diploma organized Industrial Visit for Sy & TY Students to Mayura Steel, Kolhapur on 11th November, 2022.

Blood Donation camp was organized in association with National Service Scheme Unit on the occasion of Birth Anniversary of Late Shri. Rajarambapu Patil on 01st August, 2022.

Diploma Cultural Cell organized Poster Presentation Competition on the occasion of Engineer's Day on 17th September, 2022.

विरंगुळा Annual Gathering

IDESSA Achievements

Ms. Shreya Mane, FY Computer Engineering secured Runner Up prize in Zonal & Interzonal Long Jump Competition organized by IDESSA.

Mr. Suyash Jadhav, SY Electrical Engineering secured Runner Up prize in Zonal High Jump Competition organized by IDESSA B2 Zone at Latthe Polytechnic, Sangli.

03 Students from Diploma Secured First Rank in Zonal wrestling Competition under different Weight Category organized by IDESSA B2 Zone at PVPIT, Budhgaon.

Table Tennis team of RIT Diploma Secured Runner up prize in Zonal Table Tennis Competition organized by IDESSA at RIT, Rajaramnagar.

Faculty Achievements

Mr. Amey Gaurvadkar, Training & Placement Officer Diploma awarded with Excellence in Industry Academia Interfere 2022 by MaTPO on 22nd December, 2022.

Mr. Amey Gaurvadkar, Training & Placement Officer Diploma awarded with TPO of the Year Award powered by BRAINWONDERS on 01st December, 2022 at 4th EduLeaders Summit and Awards 2022 at NESCO, Mumbai.

Mr. A. M. Kadam Civil Engineering

Mr. R. Y. Chavan Automobile Engineering

Mr. A. M. Mulla Mechanical Engineering

Mr. R. Y. Chavan Automobile Engineering

Smart Grid - An Innovative Way Of Power Distribution, Power control And Its Need in India

INTRODUCTION

India is a vast country, it has very poor transmission and distribution systems. India's transmission and distribution losses are among the highest in the world. It suffers from grave power shortage which is likely to worsen over the next few decades. Power distribution utilities are going through a reformation process to cope up with the regulatory change for reduction in Aggregated Technical and Commercial Loss. improvement in Power Quality, Reliability of Power Supply, Improvement in Customer Satisfaction and rationalization of electricity tariff. So there is need of smart grid technology that can increase efficiency of distribution system to meet the increasing demand.

Smart grid is a type of electrical grid which attempts to predict and intelligently respond to the behavior and actions of all electric power users. The users connected to it may be - suppliers, consumers and those that do both - in order to efficiently deliver reliable, economic, and sustainable electricity services. Smart Grid is the modernization of the electricity delivery system so that it monitors, protects and automatically optimizes the operation of its elements. It improves service quality, enhances reliability and reduces costs. It is a futuristic and yet practical and possible alternative for the normal Electrical Grid existing.

BENEFITS OF SMART GRID

- Self-healing: The grid rapidly detects, analyzes, responds, and restores.
- · Allows consumers to play a part in optimizing the operation of the svstem.
- Provides consumers with greater information and options for choice of vlagus.
- Tolerant of attack: The grid mitigates and is resilient to physical/cyberattacks.
- · Maintain or even improve the existing high levels of system reliability, quality and security of supply, improves existing supply efficiently

India is very big country. The Indian national grid was not designed for high capacity and long distance. We have high losses in transmission and distribution of power. We have power thefts too. According to this India badly needs smart grid. It covers system integration of renewable and non renewable power.

Features of smart grid

- Peak load reduction.
- Decentralization of power generation.
- Price signalling to consumers.
- Self healing.

- Consumer motivation for active participation.
- · Enables electricity markets to flourish.

Smart Grid is sophisticated, digitally enhanced power systems where the use of modern communications and control technologies allows much greater robustness, efficiency and flexibility than today's power systems. A smart grid impacts all the components of a power system especially the distribution level. Government of India has formed "Smart Grid Forum" and "Smart Grid Task Force" for enablement of smart grid technology into Indian Power Distribution Utilities as a part of their Smart Grid initiative to meet their growing energy demand in similar with the developed country like USA, Europe etc. The concept of smart grid is still at its grass root level. There is a misconception amongst people regarding its financial status and basic requirements. It is hands down the best thing that can happen for countries like India and especially for states like Maharashtra. If we implant this in India then it will live a life with enhancing power in a SMART way.
