

# Teachers Day Report- Tree Plantation Program

On the occasion of Teachers' Day, the Civil Engineering Department, in collaboration with the Gardening Department, organized a tree plantation program on September 5, 2024. The event was held in the Miyawaki Forest, a green zone created by the Gardening Department to promote environmental awareness and sustainability.

The program began with an address by Mr. Siddharth, the student representative, who spoke about the importance of tree plantation in creating a sustainable environment. He also expressed deep gratitude towards the faculty members for their unwavering support, motivation, and guidance, which have been instrumental in shaping the students' academic and personal development. Siddharth thanked the faculty for always inspiring students and making the tree plantation program possible. His words set the tone for the event, reflecting the college's commitment to both education and environmental stewardship.

Following Siddharth's speech, the program officially started with the Head of the Civil Engineering Department and the event coordinator planting the first tree, symbolizing the start of the plantation drive. This was followed by the Girls' Representative and her team, who planted the second tree, showing their leadership in this green initiative. Their participation was a symbol of student engagement and environmental responsibility.

Subsequent trees were planted by faculty members, whose involvement highlighted the dedication of the teaching staff to the cause of environmental conservation. The final tree of the day was planted in front of the Civil Engineering Department building.

The tree plantation drive was a collaborative effort that emphasized the college's mission to promote sustainability and environmental care. It brought together faculty, staff, and students in a meaningful way, making the day memorable for everyone involved. The Civil Engineering Department extends its gratitude to all participants for their support and active contribution, ensuring the success of this eco-friendly initiative.

The trees planted during this event will serve as a lasting reminder of the college's commitment to nurturing both the environment and future generations.
